To Break the Stock of Joe Bowers Extension.

THE OLD STOCK EXCHANGE

REVIVAL OF INTEREST IN MIN-ING SHARE TRANSACTIONS.

The Black Warrior Incorporates North Tintic Haunts—The Copper Queen—The New Exchange—New Members Admitted - Brought a Good Figure.

It is believed that a determined effort is being made in certain circles to break down the stock of the Joe Bow-ers Extension company by the circula-tion of reports derogntory to the company as to the little of its holdings. One of these rumors is to the effect

that a Mrs. Emile Johnson, claiming title to a certain portion of this property, formerly owned by her husband, now deceased, is about to institute suit against the company for the amount or value of her claim, which is, that she is entitled to ownership in the Ocean and Ocean lode, now embraced in the holdings of the company under another name.

The Heraid is informed, however, by a gentleman who is thoroughly familiar with the situation and the status of the title to the Joe Bowers Extension group, that the Johnson interests in the Ocean & Ocean claim was fortested many yours and on account of a fall-tire to do assessment work as provided for by the mining taws, and it is further stated that no work has been done on the property under the name of the Ocean & Ocean by any one for long time, according to the records of the county recorder's office, the ground having been alandoned and relocated under another pame, and as

or vaine when the lode reverts back it the government owing to a non-sompliance of the law.

The Herald's informant also say, that any right, little or interact Mrs Johnson might have had in any botton of the Estella lode is also forfeite on account of the failure to contribute to the performance of annual assessment work, while, as a marker of fact a greater portion of the property of the company, compraing seven claims, had been abandoned for many years prior location by the parties who have deeded the same to the Joe Bowers Extension company.

A pseudor feature of the whole matter is that parties in this city who are said to be baying heavily of the stock of the association at present figures.

The War Eagle.

The War Eagle, owned by William Bates, Bob Patterson and William Low, in West Tintie, says the Nephi Republic, is a bonanca of no mean proportions. People have ridiculed the idea that there was anything permanent in West Tintic, because the country is so broken. The same thing is said against Mt. Nebo, but that is another tale.

Two hundred feet, from the surface two splendid veins of ore were found, running through stratas of porphyry and lime, one vein going 72 per cent ited and 39 ounces silver, while the other and richest vein goes 16 per cent copper and from 200 to 1,000 ounces silver. It is needless to say that the trio of gentlemen have one of the biggest things in Uinh. In the copper vein are encountered large boulders coated with line, which, on being broken open and exposed to view, shows to the astonlished gaze, native silver.

This find means a great deal for this side of the country, as several of our townsmen have property in that camp.

Judge Ed Pike of Eureka was in the city resterday, preparing papers for the incorporation of the Biack Warrier company, whose group of chains adjoin the Sacramento Consolidated on the north, the Sacramento Consolidated adjoining the Bullion-Beck on the west it is believed that both of those properties are on the extension of the Bullion-Beck ore Testic.
